EDUCATION

Computer Science Major, Statistics Minor, Sociology Minor
University of Toronto

2017 – Present

Work Experience

Software Developer in Test at CaseWare (May 2020 – April 2021)

- Developed Python scripts that increased the efficiency of the team by reducing the time needed to setup the test environments
- Developed JavaScript and JMeter scripts to carry out load testing for hybrid cloud products
- Performed integration testing for a desktop application by creating C# scripts that simulate user inputs

PERSONAL PROJECTS

Workout Journal (April 2020)

- Developed a workout journal app using React Native and local MongoDB that allows users to log their workouts and track their progress

Personal Notepad (July 2019)

- Created an application using HTML, CSS, and JavaScript that allows users to edit, delete, and personalize the color of each note they create

Recipe Finder (August 2019)

- Created an application using HTML, CSS, and JavaScript that uses the Edamam Recipe Search API to look up different recipes for specified foods

SCHOOL PROJECTS

Online Assessment Platform (April 2020)

- Created an online assessment platform using Node.js, React.js, and MongoDB for teachers to gauge attention and material comprehension
- Worked in a team of seven using Git and followed Scrum procedures

Paint Program (December 2018)

- Created a drawing program using Java that included a save, undo, and redo feature
- Used Command, Factory, and Strategy design patterns to make code flexible and maintainable
- Worked in a team of four using Git and followed Scrum procedures

Tower of Hanoi Puzzle (February 2018)

- Created a Python program that lets users play a modified Tower of Hanoi Puzzle by interacting with a GUI
- Coded the program using Model-View-Controller architecture
